About Western Institute of Technology :-

Western Institute of Technology (WIT) is recognized by Government of India registered under the Directorate General of Employment & Training as Vocational Training Provider for various courses. The Mangalore University has granted affiliation to WIT for PGDBM & PGDTHM. Western Institute of Technology has been approved by the Indira Gandhi National Open University (IGNOU), New Delhi as a "Community College", and is authorized to offer Diploma, Associate Degree & Degree Programs.

Western Institute of Technology, an ISO 9001:2008 Certified Institute, has partnered with Chicago Training & Consultancy, which is a Global Registered Education Provider (REP) of Project Management Institute (PMI), an authorized IMA CMA learning system course provider, and AACEI approved education provider. Western Institute of Technology is also a collaborative training provider of Continuing Education Programs of University of Wisconsin Platteville, U.S.A and approved education provider of Franklin University, Ohio, USA.

Further, Western Institute of Technology, India in conjunction with Franklin University has established a "Host Training Site" for the University of Cincinnati NIOSH Education and Research Center to offer specific **OSHA (Occupational Safety & Health Administration)** courses.

Safety, Health & Environment in Indian Context:-

In Indian Industries it has become a trend to appoint Fire Officers/Security Officers as Safety Officers who do not have much knowledge of SH&E. Industries have started realizing now that Safety Officers cannot be comprehensive unless he/she knows the complete aspects of SH&E.

However, it must be understood that a company's response to SH&E issues affects employees, contractors, stakeholders and the surrounding community. The Company's management has the potential to play a key role in evaluating workflow performance, thereby ensuring the health and safety of employees and personnel, maintaining regulatory compliance, enhancing business reputation within the community, satisfying customer and promoting profitability. SH&E is necessary in any Industry in order to identify the controls in place to limit its impact on the environment. It is important for industries to determine the tolerable level of SH&E risk, that the business will assume. It is also important to define levels of risk with respect to employees and contractors, business operations and the company's reputation in the surrounding community.

Please find below the syllabus for the SH&E Program.

Name of the Module	Total Hours	Hours (Theory)	Hours (Practical)
Introduction to SH&E and Safety Laws	10	10	0
Construction Safety	10	7	3
Industrial Safety	10	7	3
