Programme

9.00 a.m. – 10.00 a.m.	Registration and Tea/Coffee	
10.00 a.m. – 11.00 a.m.	Opening Session: Clayton Christensen , who coined the concept “ disruptive innovation ” in the late 1990s, analyses the phenomenon through the lens of market demand . A new perspective on the disruption phenomenon comes from Rotman School of Management Professor Joshua Gans , author of the recently published <i>Disruption Dilemma</i> . “ There are important supply-side issues, ” he says. Innovative prowess is highly linked to holding a competitive advantage . Digitalization, internationalization, sustainability, and other current megatrends would appear to further accelerate the pace of disruptive technologies being developed, surpassing many incumbents across industries. This year, BITC aims to sketch the transformations led by disruptive innovations from both the technology providers and users.	
10.00 a.m. – 10.10 a.m.	Welcome Address	Mr. Indrajit Sen , President, The Bengal Chamber of Commerce and Industry and Managing Director, International Combustion (India) Limited
