DRIVE IMPACT

INTRODUCTION

Building on the success of its previous editions, this year the **4th Edition of BCC&I Tech-E-Summit will be held on August 6th & 7th, 2026 at Bengaluru**. As the hub of India's tech evolution, the city will again set its stage for bridging innovation with integration—powering the next wave of tech entrepreneurship.

This year marks a natural progression. While AI remains central, the summit broadens its scope to the wider innovation ecosystem—bringing together **emerging tech creators, IT entrepreneurs, startups, investors, and system integrators who transform ideas into scalable, real-world solutions**. The focus is on fostering stronger synergies across this spectrum while elevating the visibility of IT entrepreneurs within a more inclusive, dynamic pan-city tech community.

With the rapid rise of Generative AI, increasing enterprise complexities, and new innovation hubs emerging beyond traditional centres, the need for a more integrated approach is clear. **The summit will respond to this shift—serving as a platform to connect, collaborate, and drive sustainable technological growth.**

The summit will address crucial need to:

Bridge the Gap: Foster meaningful connections between innovative AI startups and seasoned IT entrepreneurs, combining fresh ideas with deep domain expertise and scalability.

Enable Integration: Create pathways for seamless collaboration between solution creators, startups and entrepreneurs and system integrators

Enhance Visibility: Highlight and celebrate the diverse, dynamic pool of tech startup talent and the broader IT entrepreneurial ecosystem emerging from West Bengal and the wider Eastern India region.

The-Growth Narrative: Recognize and actively integrate the vibrant tech clusters emerging across other parts of the country, fostering stronger cross-regional collaboration and a more cohesive national innovation ecosystem.

FEW SNAPSHOTS OF THE OUTCOMES FROM PREVIOUS EDITIONS OF THE SUMMIT:

- ► **Kolkata has been experiencing a GCC boom due to the regular showcase of IT Prowess of the City to the prominent GCC players of the Country through organized high profile business Roundtables with objective of potential investment in Kolkata, at the previous editions of this Summit.**
- ► **Hon'ble Minister-in-Charge, Department of Information Technology & Electronics, Government of West Bengal, Shri Babul Supriyo inaugurated the Kolkata Center of Tredence Inc., bringing to life conversations that began at BCC&I's 3rd Edition of Tech-E Summit in 2025.**
- ► **Over the past three editions of Tech-E Summit, emerging technology Startups from Kolkata have got an excellent opportunity to showcase their ventures to few of the most prominent Investors.**
- ► **Several Startups participating the Investor Pitching Session at the Summit have received seed funding from Investors who joined the Summit.**

The 4th BCC&I Tech-E-Summit is strategically positioned to address these evolving needs—bringing together the entire value chain, from high-potential startups and growth-stage entrepreneurs to investors, enterprises, and global system integrators, on a unified platform designed to connect, collaborate, and co-create scalable impact.

The theme, **“From Innovation to Integration: Powering the Next Wave of Tech Entrepreneurship,”** signals a decisive shift from ideation to implementation. It underscores a market reality: innovation today is defined not just by breakthrough ideas, but by their seamless integration into business ecosystems and real-world applications—particularly through transformative technologies such as AI.

Sub-Themes:

- ▶ **Building with Emerging Technologies: Opportunities for the Next Wave of Entrepreneurs**
- ▶ **From AI Innovation to Enterprise Integration**
- ▶ **Showcasing IT Excellence: Elevating Tech Entrepreneurial Visibility from Bengal to the National Stage**

Through curated interactions and high-impact engagements, the summit will demonstrate how deeper collaboration among startups, entrepreneurs, investors, intrapreneurs, and system integrators is accelerating the journey from innovation to commercialization—unlocking new business models, driving large-scale adoption, and shaping a more connected, future-ready tech ecosystem in India’s technology capital, Bengaluru.

PROGRAMME FLOW

DAY 1

6TH AUGUST 2026: Investors' Connect Day

is curated as a high-impact platform to connect promising startups with leading investors and mentors from across the country, featuring:

- Speed Networking with Investors and Mentors
